COURSE CONTENT

The IT Specialist Device Configuration & Management Certification Course is wonderfully guided by our techy new instructor, Noah LeFevre. Delve deep into the Windows 10 operating system, fortify your network's device security, and hone your troubleshooting detective skills. This immersive experience promises to arm students with the essential skills and knowledge vital for navigating the dynamic IT landscape with confidence. Unlock your full potential and emerge not just certified, but truly empowered to provide IT support for Windows computers.

MAIN INGREDIENTS

- Module 1:** Windows Installation and Configuration
- Module 2:** Application and Peripheral Management
- Module 3:** Data Access and Management
- Module 4:** Device Security
- Module 5:** Troubleshooting

Noah has worked in the IT field for over half a decade. He holds a bachelor's degree in networking & security and is currently pursuing a master's in cybersecurity. Noah is passionate about introducing others to the joys of IT and loves witnessing a challenging concept click for a student. When he's not immersed in computer-related activities, he enjoys playing his guitar, pickleball, and going for hikes before sunrise.
